

Data & More | Personal Data Minimization

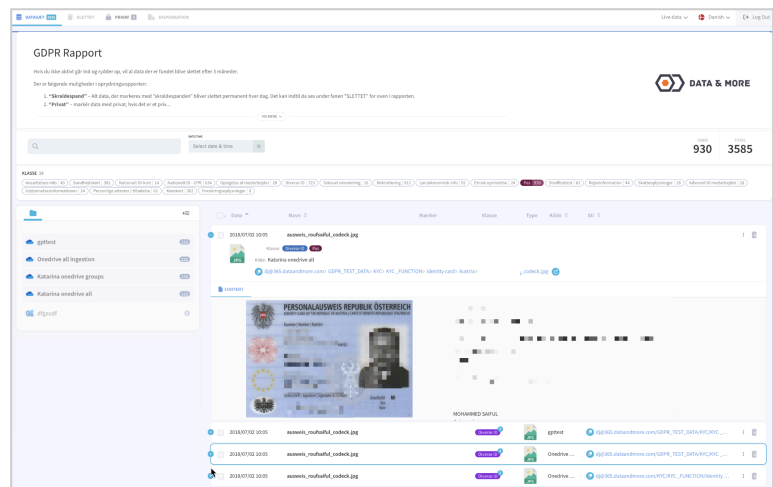

Deletion and Reporting of Personal Information in Mail, OneDrive, SharePoint, and File Drive

+150,000 active users | Full GDPR classification of Personal Data | 28 languages

Make it easy for you and your colleagues to comply with the Personal Data Regulation.

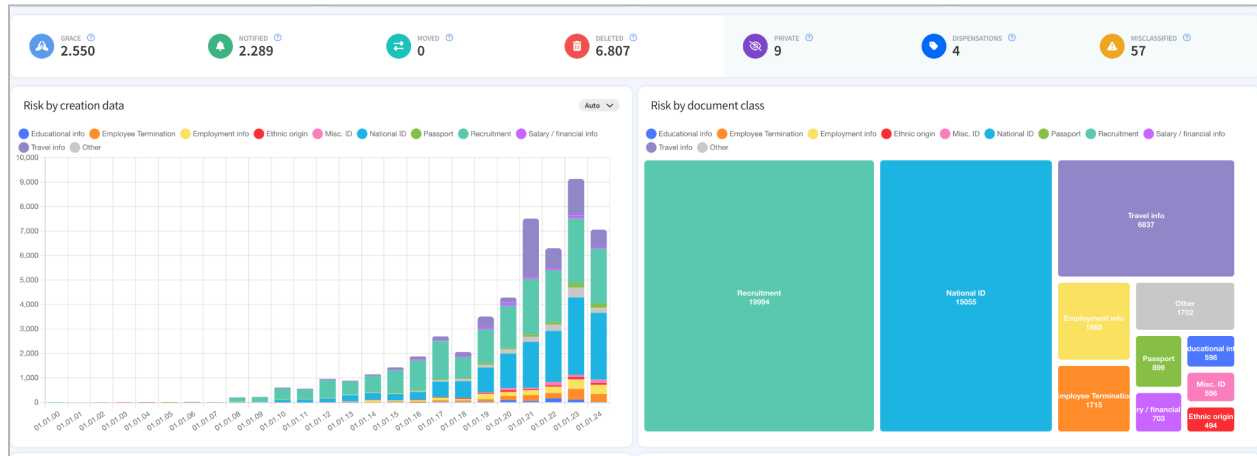

Data & More's deletion tool gives you and your colleagues a report on the personal data you are responsible for. With the help of the report, you can directly see which documents or emails contain old personal data that must be deleted. In the report, you can either delete emails and documents directly or let the tool do it automatically.

We have spent 8 years developing a search engine that can find the RIGHT personal data so you can spend your time on what is important. Our tool is used by over 150,000 people from very different backgrounds, which has forced us to make it super user-friendly so that everyone can join.

DPO reporting on live data and help with insight requests

As a DPO or Compliance Officer, you can monitor your compliance level directly. One of the most important things is that you can quickly identify Personal Data that has no owner but needs to be cleaned up. The DPO report makes it possible to delegate responsibility for clean-up directly within the organization. As a DPO, you can also use the tool to service access requests by collecting mail and documents in one report for download.

Easy and safe deployment in the organization

We deliver to the Police, Defence, and NIS 2 organizations and companies that, like us, prioritize compliance and security. We are GDPR 3000 and ISAE 3402 certified and have security-approved employees.

Our largest customers have over 40,000 employees, and the smallest have under 20 employees. We can scan both on-premise data and data in the cloud. The solution can be implemented as a service from our data center, or you can have it implemented in your own data center.
